

Virginia Air Board
c/o Terry Darton
Air Permit Manager
13901 Crown Court
Woodbridge, VA 22193

Dear Air Board-

This letter serves as my voice of support for saving the Potomac River Generating Station. I believe the solution called a stack merge is a terrific idea. I really didn't know much about this proposal until recently, and I wanted to take the opportunity to actively participate in this great debate. I understand that this project will improve air quality, save jobs, preserve a historical site, and is tax free to the constituents of Alexandria.

With all of the positives, I do realize there must be some opponents. I think it would be hard pressed to find a better alternative that can be constructed and implemented with the same economical and environmental benefits as this. I am a 63 year old retired Master Planner for Ft. Belvoir, so I believe that planning is a vital part of any successful project. It appears that there has been careful planning right down to the economical factor, which sometimes goes lacking.

I appreciate you taking the time to read my letter. I would implore you to take this and many others like it into consideration when making the final decision regarding the solution. The voice of Alexandria says to keep the plant. Thanks in advance and have a good day.

Thank you for your service,

Lorance Lisle
